MAKING ACID PHOSPHATE

Importance of the Product in the Fertillzer Industry Leads to Publication of Bulletin.

The manufacture of acid phosphate has come to play such an important part in the fertilizer industry of the United States that the Department of Agriculture has just issued a bulletin (No. 144) on the subject, which is designed both for manufacturers and for progressive farmers. Phosphate rock, it is said, has almost entirely displaced bone, guano and apatite as a source of phosphoric acid and a knowledge of the exact composition of the rock is of importance because not only the phosphate of lime but all the impurities as well are acted on by the sulphuric acid used as a re-agent and influence the finished product.

Of all the impurities occurring in phosphate rock, compounds of iron are the most dreaded. Even in small quantities these elements are apt to cause a certain amount of reversion, and in large quantities may render the product sticky and unfit for use. By careful handling, however, phosphate high in iron and aluminum compounds may be made to produce high grade acid phosphate. On the other hand carbonate of lime is rather desirable when the quantity is not excessive.

Both the "den" and the "open dump" systems are in general use for making acid phosphate, each having certain advantages. In the "denn" system, after the rock and sulphuric acid are thoroughly mixed the compound is dropped into a closed, brick-lined chamber or "den," where the chemical reactions raise the temperature to a high point and are completed in twenty-four hours of so, the product being then ready for shipment. In the "open dump" system, as the name implies, the mixture of acid and rock is dumped on an open pile and may require a month or even longer to become fit for use. The fumes given off in the process, moreover, may become a serious nuisance in the vicinity of towns. On the other hand, the removal of the acid phosphate from the den is troublesome, and when done by hand sometimes dangerous.

The cost of producting acid phosphate, the bulletin says, depends on a number of varying factors, such as the size, location and equipment of the plant and the cost of the sulphuric acid. Exclusive of office expenses it may be said to range from \$6.20 to \$8.00 a ton. The product is sold on the basis of its so-called available phosphoric acid content, and is worth at the factory from 40 to 56 cents a uni:, or twenty pounds. The phosphoric acid content runs from 14 to 21 per cent. of the marketed product.

See That Skimmed Milk Fed to Animals is Pasteurized or Boiled

The fact that the foot-and-mouth disease may be communicated to cattle, sheep, other ruminants and swine, through the milk of infected cows, makes it especially important at this time for cattle raisers to make certain that the skimmed milk they obtain from creameries has been pasteurized. Even if there is no foot-andmouth disease in the farmer's neighborhood, it nevertheless is a great safeguard for him to see that the creamery skimmed milk which he feeds to his animals has been pasteurized, as tuberculosis can be communicated through raw skimmed milk. So serious is the communication of tuberculosis through milk to swine that the meat packers discriminate against the hogs in certain dairying districts.

The department has long advocated this course, and the specialists hope that the danger of foot-and-mouth disease may lead those who have not been careful in this matter in the past to adopt this practice and continue it after the present epidemic has been stamped out.

Where a creamery does not pasteurize the milk, or where the farmer obtains skimmed milk from other farms for feeding to his hogs, he can make certain that he does not carry the foot-and-mouth germs or spread tuberculosis by bringing the skimmed milk to the boiling point before bringing it to the farm. Boiling does not interfere with its feeding value, although real pasteurization at 145 degrees for 30 minutes is the better practice.

Value of Coal Tar in Poultry House Referring to the value of coal tar. Hotchkiss says that if it is put in rat holes, runs, etc., rats, mice, mink and weasels will desert the premises. It is equally effective for lice, by coating it on the roost. For the latter it may be thinned with gasoline, if desired, and applied to perch and walls of the poultry houses with a whisk broom, once a year. The writer has found gas tar excellent for scaly-legged fowls. One application is generally sufficient to clean off the sacles. Give the legs a good coating, allowing it to wear off, and the chances are the scales not only drop off, but the legs are in finer condition than by the use of grease.

Poultry Students

In the poultry department of Cornell University nine out of the fiftysix students are young women, and it has been discovered that they do the best work. Each student has a flock of tthirty or forty hens. The women pupils use wheelbarrows to carry their feed cans and hoppers, and study the intricacles of all the machinery used from gasoline engines to bone-cutters and incubators. Every afternoon there is a "practicen" of two hours, which consists of planning and studying poultry buildin and colony houses, making egg crates, selecting fowls, the anatomy of poultry, the value of feed of various kinds and the scientific operation of incubators and brooders.

For An Impaired Appetite. To i mprove the appetite and strengthen the digestion try a few does of Chamberlain's Tablets. Mr. J. H. Seitz, of Detroit, Mich., says: "They restored my appetite when impaired, relieved me of a bloated feeling and caused a pleasant and satisfactory movement of the bowels." FRENCH CAPTURE **IMPORTANT POINT**

Drive Germans Out of Neuville-St. Vaast and Also Extend Their Position.

London, June 10 .- The French have driven the Germans completely out of Neuville-St. Vaast, extended their posttion at Hebuterne and consolidated their gains at Tracy Le Mont, where the German front reaches nearest to Paris. The midnight communique, received here from Parls, states that after taking the last group of houses on which the Germans had managed to retain a hold in Neuville, the French troops swept forward to the north of the village and have made gains of considerable importance.

Berlin admits the loss of Neuville, but states that east of the town the French, attempting to advance, were thrown back, suffering severe losses. The capture of Neuville gives the French an important advantage in their operations against the Germans in the "labyrinthe," the field work southeast of the village. Here, Paris reports, the French progress continued, especially in the southeastern part.

British Sink Teuton Submarine. The sinking by the British of a German submarine, the sending to the bottom of the Turkish gunboat Marmaris by the British in the Tigris river, the blowing up of the German steamer Hindenburg by a Russian mine in the Baltic, the torpedoing by a German submarine of the British collier Lady Salisbury near Harwich lightship in the North sea and loss of one of the allies' transports by Turkish shell fire in the Dardanelles features reports of marine warfare Wednesday.

Official announcement was made by Secretary of the Adimarity Balfour that in the sinking of the German submarine six of her officers and 21 members of her crew had been captured Mr. Balfour also announced that German submarine prisoners hereafter shall be accorded treatment identical with all other German prisoners in England. Mr. Balfour failed to state when or where the German submarine

The sinking of the Turkish gunboat Marmaris, together with the capture of the Turkish transport Mosul, took place in the Persian gulf region. The Marmaris displaced 492 tons and carried a complement of 66 men. She was armed with four 9-pounders and two 1-pounders. She also was equipped with one torpedo tube.

Austro-German Armies Win. Another victory for the Austro-German armies in Galicia has just been announced officially at Berlin. The town of Stanislau has been captured by the Teutonic forces in their eastward

A dispatch from Austrian press headquarters to Cologne says that the Russian army in Bukawina, the Austrian crownland east of Galicia, has been cut off the Russian forces in middle Galicia and is being pressed east-

Stanislau lies on the line between Lemberg, the Galician capital still held by the Russians, and Czernowitz, capital of Bukowina.

British Land Losses Are 258,009. in the house of commons that the total | right, for the lowlest to attain the of British casualties from the beginning of the war to May 31 was 258,-009 men in killed, wounded and miss-

Divided into categories, officers and men, the list shows the following: Killed, Wounded, Missing, 3.327 Officers 3,327 6,496 Other ranks ... 47,015 147,482

Totals 50,342 153,980 Mr Asquith's statement of losses was for continental and Mediterranean forces of the empire. He promised to give the losses in the naval division later. Neither did the list include the forces of Great Britain engaged in the smaller wars in Africa and the near east.

K. OF P.'S CLOSE MEE

OHIO GRAND LODGE CHOOSES CLEVELAND FOR ITS GATH. ERING NEXT YEAR.

Zanesville, O., June 10.-The grand lodge, Knights of Pythias, closed its session in this city after electing two directors of the Pythian home and a grand lodge trustee. The honor of entertaining the grand lodge meeting next year was captured by Cleveland. Delegates elected William Kirschner of Dayton and J. W. Blackburn of Lima directors of the Pythian home, and W. S. Winn, Zanesville, was

chosen grand lodge trustee. Aside from the election, the next event of importance was the installation of grand lodge officers, elected by vote of the several lodges last Decem ber. These are the new officers: William F. Schuchardt, Cincinnati, grand chancellor: George L. Behrens, Columbus, vice chancellor; E. A. Celt, Marietta, prelate; A. A. Wormwood, Cleve land, master-at-arms; E. W. Tidd.

Cleveland, outer guard. The membership committee report showed Ohio is the banner state in the Union with a membership of \$3,000.

Stockdale, inner guard; Fred E. Bruml,

Cow Breaks World's Record. Wauseon, O., June 10 .- Lindenwood Chloe, Holstein cow owned by George Reising of near here, has broken the world's record for milk production. She produced 674.3 pounds of milk in seven days.

Infant Is Scalded to Death, Napoleon, O., June 10.—While play-ing about the kitchen where his mother was scrubbing the floor the three-year-old son of George Vondielen tell into a pail of boiling water and was fatally scalded.

Boston Vernacular. "Good youth, may I assume that you are vending newspapers?" inquired the stranger who was trying to ace like anstive of Boston. "In sooth, I am sir."

SOLONS COULD BE AGAIN SUMMONED

Special Session of Legislature May Occur if Buckeye State Goes Dry.

Special Columbus Correspondent, Columbus, June 10 .- There is just one contingency that would have the effect of calling the general assembly into special session next year and that would be the contingency of the state's going dry. Legislative action would be necessary in such an event to put

e constitutional amendment into efect. The governor could ignore the necessity, and that would create a condition of uncertainty that might mean the continuation of saloons until the assembly should meet in regular session in 1917. But the leaders of the Anti-Saloon League forces say they have "informal assurances" from the governor that he will call the legislature into extra session should the proposed state-wide prohibition amendment carry next November. Thus the inference is left that if the amendment is adopted there is little question of the present solons getting together again. Under the new constitution the governor has the right to restrict the action of any special session to stipulated subjects, and in the event of the calling of a special session next year he could thus prevent the assembly from doing anything except to provide for the machinery to make the state ctually saloonless. Meantime the Anti-Saloon League has issued a statement declaring that it is certain that Ohio will go dry next fall. Three factors, says the drys, will make for this victory. They are better organization, a more alert spirit on the part of all dry workers and more money. As against \$150,000, which they had last year, the temperance leaders say that this year they have a quarter of a million to spend in the campaign. On their part the wets are apparently just as confident of success in defeating the prohibition amendment. They insist that they are better prepared than last year for the fray and that their workers are in finer fettle than last year. The wet, or liberal machinery, by the way, is now well under way, as the dry machinery has been for some time. Just now the ardor and enthusiasm of an old-fashioned temperance fight is lacking, but this is because the fight is too young. Propaganda work for the most part has not been undertaken as yet. The activities of the opposing forces has been taken up with the perfecting of organization and the deploying of battle lines. The spectacular part, the heavy cannonading, the remendous artillery with which each side will hurl argument and invective is yet to be brought to the front. But that it will be so, there is no ques-

Urnes All to Display Flag. Gov. Willis has just isssued a proclanation calling on all citizens of Ohio to display the United States flag Monday, June 14, in recognition of the 138th anniversary of the flag's adoption. He urges every person on that day to give "earnest thought to the purpose, the intent, the aim, the hope of the sacred Stars and Stripes. The Premier Asquith has just announced flag stands for the transcendency of universal freedom without regard to race or color," the governor's proclamation adds. "It is not a flag of conquest but of concord. It is not a flag of haughtiness, but of humanity and humility. It is not a flag of oppression, but of optimism and opportunity. It was conceived in a spirit of ardor, but not of arrogance. If all of us become imbued with the full meaning of the flag, then there need be no fear for the republic, and that should be the object of flag day, to imbed indelibly in the minds of the people the true significance of the Stars and Stripes."

Orders Practice Abolished. Evildeers do not have much difficulty in escaping punishment in the Cincinnati municipal court, according to State Examiner Moses Blau, who has just filed a report on that court with the state accounting bureau. This is because of a practice on the part of the court in allowing professional bondsmen to appear and enter guilty pleas for the persons arrested. Often in such cases only nominal fines and costs are imposed. As a result of this custom the collections of the court are away below what they should be. The examiner characterizes the practice as disgrace and orders that it be abol-

Think Cost of Water Teo High. Purley A. Baker, general superintendent of the National Anti-Saloon League, and his wife are protesting against the high cost of water in Westerville, where they reside. The rillage officials sent the Bekers a bill for \$17 for water alleged to have been used last summer, and they insist that the charge is excessive and have asked the Franklin county common pleascourt to prevent the village from collecting it. The controversy is now before the court.

Makes Postal Recommendation. Frement, O., June 10 .- Congressman A. W. Overmyer has recommended the appe atment of Lewis L. Stein, Democrat. as postmaster at Woodville O., to succeed Miss Sivalis.

Man is Killed on Treetle. Pottstown, Pa., June 10 .- A man about 60 years old was instantly killed by a Pennsylvania railroad passenger train on the Brookes Crossing trestle, 100 feet high, spanning the Schuylkill river. He was half way across when overtaken by the flyer.

Hotel Man's Body Found in Bay. Sandusky, O., June 10 .- The body of Philip Herzog, 63, father of Charles Herzog, landlord of the Bijou hotel was found floating in Sandusky bay. It is thought he dozed while fishing from a dock near the Cedar Point pier, fell over and drowned.

Note Is Decoded, Given to Ambassador Gerard and Copy of It Delivered to Kaiser's Foreign Secretary.

Washington, June 10 .- This country's ultimatum to Germany, which declares that the United States will uphold the rights of its citizens on the high seas at any cost, was cabled to Berlin at 2 o'clock Wednesday after-

The note arrived in Berlin this after noon, was decoded and delivered to Ambassador Gerard. The American minister then delivered a copy of the note to the German foreign secretary. It now lies with Germany whether there is a break between the two coun-

The note will be given out for publication in the morning newspapers of While the contents of the note have

been carefully guarded, it is known that it leaves no alternative to Germany than immediate granting of American demands, unless it desires to break off relations with the United States.

Should such a break come, it would be followed by even graver complications should the attacks on Americans at sea be continued.

There was a well-defined trend of opinion in official quarters that the resignation of Mr. Bryan would go far in impressing Germany with the earnest intention of the United States to insist on its rights.

It is understood that the United States has, from time to time, received authoritative information that high German officials believed the administration was committed to a policy of uninterrupted peace and did not in tend at any time or under any circumstances to go to war. Mr. Bryan's resignation, many officials thought, would remove all doubts in Berlin, and if Germany were sincerely desirous of avoiding war would arrange for a way out of the problem that has arisen which could honorably be accepted by

the United States. The view that Mr. Bryan's action, therefore, might favorably influence the situation was shared by some of his closest friends.

The note is about 1,500 words long and is signed by Acting Secretary of State Lansing.

Stray Bullet Wounds Child. Sandusky, O., June 10.-While playing in the yard in front of her parents' nome, Helen, three, daughter of Bert Rowe of Vickery, received in her back a shot from a rifle. Where the shot came from is unknown. It is thought she will recover.

Affidavit Maker Is Found. Washington, June 10 .- The department of justice was notified by its agents in New York that Gustav Staole, one of the makers of an affidavit alleging that the Lusitania carried guns on her last trip, has been found.

When a good man goes in for reform work he begins at home.

PRESIDENT WILSON AND WILLIAM J. BRYAN TAKE FORMAL LEAVE OF EACH OTHER.

Washington, June 10.-With a fer-

vent and sincere "God bless you" from each, President Wilson and William Jennings Bryan, his premier up to Tuesday, took formal leave of each other at high noon Wednesday in the historic blue room of the White House. Secretary to the president, Tumulty, who was the sole witness of the parting, says it was an affecting scene. Mr. Tumulty, in describing the scene to the correspondents, said that both the president and Mr. Bryan were much moved by the farewell and that the depth of their emotion was manifest in their speech and action.
